## **Currie Rose Reports Second Drilling Program at Mabale Hills Tanzania**

Currie Rose Resources Inc. will commence drilling immediately at the Mwamazengo gold discovery on the Mabale Hills project in central Tanzania.

The program is expected to consist of 1,400 metres of Reverse Circulation (RC) drilling and 1,200 metres of RAB (Rotary Air Blast) drilling.

The RC drill holes will target the potential “down dip” mineralisation intersected during March 2005, where 4 RC drill holes intersected exceptional near surface gold mineralisation over a 225 metre strike length as tabled below. Extensions to the current strike will also be targeted.

**Table 1: Mwamazengo Prospect - Significant Drill Intersections**

Hole Id	Easting (UTM)	Northing (UTM)	Dip (°)	Azimuth (°)	Depth (m)	From (m)	To (m)	Interval (m)	Au (g/t)
