NEWS RELEASE

TRADING SYMBOL: CUI

December 13, 2005

CURRIE ROSE RESOURCES INC. (CUI-TSXV) UPDATES ITS TANZANIAN GOLD EXPLORATION PROJECTS IN THE LAKE VICTORIA GOLD CAMP

MABALE HILLS PROJECT

With the most recent drilling campaign having successfully defined and expanded the Mwamazengo discovery, (see News Release Sept 7, 2005) a detailed ground magnetic geophysics program is in progress and to date has identified other high-grade targets. The entire Mwamazengo discovery falls within a “magnet low” and a parallel “magnetic low” has been identified east of the Mwamazengo discovery. This area coincides with a number of artisanal pits and will be further investigated during the next phase of activity.

The Mwamazengo discovery represents only a small part of the Mabale Hills Project claim and further mapping of the property has been completed identifying favourable geology.

In addition, the accelerated work being done on joint venture partner Sub-Sahara’s Nyanzaga Project (with Barrick) situated on the same north-westerly regional structure as well as the extensive colonial mining identified during mapping, has encouraged the Company to commission a 100 metre spaced airborne magnetic (Helimag) and radiometric survey of the Mabale Hills claim block (261 km). This survey has been slated to begin in January, 2006

See maps on www.currierose.com

Once completed, Currie Rose will have compiled comprehensive data to begin drilling new targets, along with further drilling on the original discovery.

ON BEHALF OF THE BOARD OF DIRECTORS

“Harold Smith”
Harold Smith, President

The Qualified person for the release of this exploration information is Michael Griffiths AusIMM, Director of Currie Rose Resources Inc. And Chief Executive Officer/Director of Sub-Sahara Resources NL.
