PREPARATION FOR DRILLING AT MABALE PROJECT IN TANZANIA COMMENCES

Harold Smith, President, Currie Rose Resources Inc., is pleased to announce earthworks have commenced at the Manyiro gold prospect in preparation for first pass drilling.

The Manyiro prospect is one of 3 first priority targets generated by a helimag geophysical survey completed in January. This prospect has returned a series of co-incident significant soil anomalies over 1km of strike. An IP survey will be completed over the next week and a drilling is expected to commence during the next 10-12 days once the drilling contractor has completed its current contract.

First pass work at the Ilalucha prospect has also returned co-incident helimag, ground magnetics and low order soil anomalism. This area will be drilled at the completion of the Manyiro drilling.

Further exploration work will continue on the other prospects in the immediate area and the drilling program will be extended to drill test these areas.

ON BEHALF OF THE BOARD OF DIRECTORS

 "Harold Smith" Harold Smith, President

The Qualified person for the release of this exploration information is Michael Griffiths MAusIMM, Director of Currie Rose Resources Inc. and Chief Executive Officer/Director of Sub-Sahara Resources NL.
