Samples from Sisu River (Mabale Hills) in Tanzania

Currie Rose Resources Inc. is pleased to announce that the results of a series of grab samples from Artisanal pits on the Sisu River prospect that forms part of the 100% owned Mabale Hills Project in Tanzania, East Africa.

A total of 13 samples were collected from insitu material consisting of sheared/silicified quartz porphyry with minor pyrite and arsenopyrite accessory minerals. The sample area contains numerous artisanal pits, covering an area of approximately 150m x 30m with colluvial overburden approximately two to three meters deep.

The Sisu River prospect is approximately two kilometres from and within the same geological package as the Mwamazengo discovery.

Table 1: Significant gold intercepts 1g/t gold at Sisu River Prospect area.

Sample Number	Easting (UTM)	Northing (UTM)	Gold (g/t)
SS-X-09-001	488809	9655276	2.05
SS-X-09-002	488809	9655276	0.47
SS-X-09-003	488808	9655256	89.20
SS-X-09-004	488808	9655256	40.70
SS-X-09-005	488781	9655354	9.44
SS-X-09-006	488781	9655354	1.49
SS-X-09-007	488802	9655384	1.87
SS-X-09-008	488789	9655408	0.06
SS-X-09-009	488791	9655278	23.00
SS-X-09-010	488792	9655290	4.47
SS-X-09-011	488792	9655290	4.13
SS-X-09-012	488792	9655290	3.96
SS-X-09-013	488802	9655260	21.30

*All values are uncut

Of the 13 samples collected, 6 returned better than 5g/t gold with a high of 89.2g/t whilst a further 5 samples returned grades between 1-5g/t gold. Only 2 samples returned values below 1g/t gold.

The Mabale Hills project consists of five licenses and one application covering 261 square km and includes the Sisu River, Mwamazengo and Dhahabu.

The Sisu River is a high grade gold target that the Company plans to drill in the spring after the wet season in Tanzania.

ON BEHALF OF THE BOARD OF DIRECTORS

“Harold Smith”

Harold Smith, President

The Qualified person for the release of this exploration information is Michael Griffiths MAusIMM, Director of Currie Rose Resources Inc. and Director of Chalice Gold Mines Limited.
